

## Choose the best Restaurant POS

Mercury+ POS for Restaurants is a perfect tool to manage your restaurant.

Mercury+ provides easy, stable, efficient, and reliable managerial system for different types of restaurant: from small take-out only restaurant to chain restaurant around the world. The Mercury POS system helps restaurants improve their managerial capacity while lower the costs.

Mercury+ program includes:

- Take-out
- Delivery
- Restaurant
- Bar
- Reservation

Every function is ideal, artistic and carefully designed with the perfect touch screen.

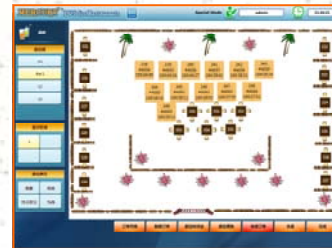

Mercury+ is simply designed, and easy to understand. This means that restaurants do not need excessive amount of time to train their staff to use this system

Mercury+ is an international

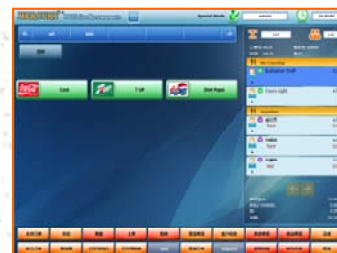

system that can be used in different languages. Mercury can show different languages on the screen. Mercury+ allow our customers to set different languages for different stations independently. To set up a multi-language system is very simple. All you need is to download our language resource online. Hence, you can use the Mercury+ anywhere around the world.

Mercury+ uses MSDE software. We also provide automatic switching slave system for master system to ensure restaurant's continuous heavy workload.

Mercury+ is an Internet Ready system. Our customers enjoy our services on the Internet. These services include online update, menu or language download, database backup, remote access service, e-commerce, mobile SMS, etc.

Order Menu

## International Support

Mercury+ provides a perfect international support.

Mercury+ screen can display different languages, and everything in the system can be displayed in multiple languages.

In addition, waiter station can select its own display language.

kitchen station can also select its own language. Mercury receipt printer is also available in different languages .

Our customers can translate or change these languages resources. We will also provide different language resources download online.

## Perfect Management for Your Menu

For restaurants' convenience, Mercury+ menu function provides different systems for Western-style food, Asian food, and fast food.

The menu can display pictures next to dish names in multiple languages.

Users can set a dish with different time, places, prices, and discount rates. With Mercury+, these can be so easy:

- Assign different ingredients for pizza, hamburger to meet consumers' personalized need
- Each dish can be organized by revenue center, designate kitchen printer

or display output

- Assign course orders
- Combine different dishes for a meal group
- Arrange orders to different categories to help restaurants classify.

For the first time Mercury+ users, building a menu is an boring job, but an important step. Mercury+ menu program contains more than 5000 types of food. To built a new menu, users only need to select all types of food they provide and make some slight changes.

## A Powerful Kitchen

Mercury's kitchen system not only supports the kitchen printer, but also supports the kitchen monitor.

The kitchen system can display in multiple languages. It follows the language that the kitchen assigns, and depend on the situation, switch to the second language.

To process customers' orders, Mercury provides a flexible system that can categorize the coursing order to resolve restaurant's

heavy workload.

The Kitchen branch concentrate outside of POS Server to eliminate the complicated process.

The kitchen can set up combine orders, it can also shows the same item from different orders on the same screen. As a result, the restaurant can easily satisfy consumer demand.

## The Shortest Breakdown Time

Any system can breakdown at any second.

Hardware will possibly expire, the operating system will possibly collapse, the

application procedure will possibly stop responding.

Mercury eliminates

mistakes from operating system and application procedure. In addition, Mercury only requires a very short restoration time to process.

The Server in Mercury not only provides a perfect backup system, but also an efficient automatic switch system that increases the operation reliability and significantly reduces the breakdown time.

Some former database and operating system might cost you thousands of dollar, but Mercury doesn't.

## Let Mercury provides you a better customer services

Sunkeen knows that it's essential for a restaurant to keep its customers. Therefore, Mercury+ adds a client management function in the fundamental edition.

The program can record customer data, and

provide VIP card information and discount policy. Through our carefully designed discount program, restaurants can process different discount rates in various ways. The discount can be used in all the orders, certain dishes, different discount rates, and discount effective time. Gift card is also an option.

For our customers who provide take-out and deliver services, Mercury+ has a Called ID function that shows customers' order history. This function reduces the ordering time.

The report from the customer database helps a restaurant to analysis its customer consumption on different dishes and consumer expanses. From the data, a restaurant will be

able to adjust its sales strategy.

## Integrated Credit Card Payment System

Mercury+ is approved and connected to many credit card processing center that promotes an easy transaction for customers.

Mercury+ is supported by many credit card companies. Mercury corporate with almost all types of credit card to provide customers different payment options.

Our credit card payment system is authorized with Mercury and Lucy credit card processing center. We look forward to corporate with more credit card processing center in the future.

## Mercury can provide more.....

Do you need to know how many seats are

available right away? Mercury+ allows each restaurant to set up its sitting chart to help manager to see available seats within a second.

If that is not enough, Mercury+ helps the manager to see what tables to put together for a large party.

Mercury+ is friendly and easy to understand. It provides tips for every step, which will only take a short amount of time to train new staff.

Mercury+ offers many editions to meet our customers' need: from the basic version to the professional version.

In addition, specific function can be installed to Mercury+ to satisfy special service needs.
